

SWASTHI COMPUTERS

SERVICE CATALOGUE

Automation & AIOps

Automating workflows, IT operations, and AI model lifecycles — from Power Platform automation to AI-driven operations management and predictive maintenance. We are actively developing our MLOps and predictive MRO capability through the WindTrack roadmap.

PROVEN

Power Automate & Power Apps Solutions

We build automated workflows and low-code applications that eliminate manual, repetitive processes.

Monitoring & Alerting Pipelines

Automated infrastructure monitoring with intelligent alerting, reducing mean time to detection.

NOW

AI-Powered IT Operations (AIOps)

We apply AI to IT operations data — logs, metrics, events — to detect anomalies and reduce alert fatigue.

ASPIRE

MLOps — Model Lifecycle Management

We are building MLOps capabilities for model versioning, monitoring, retraining, and governance. WindTrack's predictive MRO model will serve as our proving ground.

Predictive Maintenance for Industrial Equipment

WindTrack's next phase: an ML model that predicts component wear before failure, extending turbine life and reducing unplanned downtime. This approach extends to any industrial machinery.
